Sessions
* When is biomedical research illegitimate?
  From human cloning to the stigmatization of vulnerable populations
* Is biomedical research over-regulated or under-regulated? A comparative perspective
* Experimenting or treating? Drawing a fine line in times of a worldwide pandemic
* Lost in translation? The ethics of shifting from translation to implementation
* New ethical challenges in the age of big data and precision medicine
* What social responsibilities, if any, should big-pharma companies (and other large private companies) have?
* Artificial intelligence (AI) and machine learning in biomedical research
* The role of the IRB committees: Research, drug development, ethics and regulation – How to mediate between them all
